Createspace, United States, 2015. Paperback. Book Condition: New. 254 x 178 mm. Language: English . Brand New Book ***** Print on Demand *****.This book examines existence of dilation of time and dilation of space introduced by Albert Einstein in Special Relativity and General Relativity. The author uses string theory introduced in his previous publication under the title Absolute String Theory to explain gravitation and time deviations without resorting to ideas like time or space dilation or contraction. By this way, Halza resurrected the classical physics to be the modern physics when is applied onto strings as the elementary units of matter and energy. Absolute String Theory of the classical physics explains all mysteries in our material world and therefore the theoretical physics does not need to use philosophy and mathematical models and abstractions of physical objects.
